List of papers presented at parallel sessions

344  Floris Goerlandt  A Probabilistic Model for Navigational Accident Scenarios in the Northern Baltic Sea

517  Fei Long, Peter Zeiler, Bernd Bertsche  Modelling the interaction in redundant production systems for analysing their productivity and availability with high-level Petri nets

580  Tao Wang, Youcai Yao, Yang Li, Ning Wang, Liwen Wang, Lingchao Qin  Performance Analysis of Co-based Alloy Coating by Laser Cladding

590  Krzysztof Lewandowski  Hazard from increasing the risk of the numbers of earthquakes for the European Economy Growth in next 50 years

616  Milan Holicky  Risk based reliability required in construction

621  Claudia Vivalda, Giovanni Boe  Addressing cost uncertainties when planning and implementing a monitoring programme for a Carbon Storage site

628  Yang Chen, Yi Yang, Jinsong Yang, Jingjing He  Quantitative assessment of crack size based on Lamb wave method

650  Eva Lantsoght, Cor van der Veen, Dick Hordijk, Ane de Boer  Reliability index after proof load testing: viaduct De Beek

664  Claudia Vivalda, Vittorio Verda, Andrea Carpignano, Cristiana Dell'Erba, Daniele Cagliero, Elisa Guelpa  Forest Fire Risk Analysis Methods and Simulation Tools

669  Alexey Leksin, Uli Barth, Damir Adeulov, Ralf Mock  Comparison of Dutch and Russian standards for calculating the risks of a vapour cloud explosion

670  Marko Gerbec  Management of technical and organizational changes

673  Carlos Parra, Vicente González-Prida, Adolfo Crespo, Juan F. Gómez, Pablo Viveros, Fredy Kristjanpoller, Antonio Guillén  Audit Proposal for Maintenance, Reliability and Warranty Management Process

675  Ki Sang Son  Investigating Safety Consciousness Level of the University Students

678  Marc Zeller, Kai Hoefig  SpeCTRA: automated Synchronization of Component fault TRee and model-based FME(D)A

679  Seyed Mohsen Hoseyni  Updating PSA Model Using Results of Success Criteria Analysis

680  Cristina P. Medeiros, Marcelo H. Alencar, Adiel T. de Almeida  Information visualisation supporting a decision-making process in the management of multidimensional risk in gas pipeline

681  Cristina P. Medeiros, Marcelo H. Alencar, Adiel T. de Almeida  Uncertainty sensitivity analysis prior to making a final recommendation to the Decision Maker in a multidimensional risk of gas pipelines
Multidimensional analysis of failure consequences in the RCM approach: contributions to the decision-making process

Information and confidence levels in risk results—can both be obtained?

Rail infrastructure as part of the critical infrastructure

An approach to determine component reliabilities of pile-guided floater based on economic evaluation

A survey of the software and safety case development practice in the railway signalling sector

The safety of major hazard sites—evaluation of third party risk

Resilience Engineering and safety in Agile Development (through SafeScrum)

PFD average calculation through a MooN Architecture System

On the nature of serious incidents in air traffic

Walk-through metal detector assessment as a part of airport security management

Assessment of management quality of occupational health and safety as a result of the multi-criteria task

Assessment of the management quality of the occupational health and safety at the extraction department of the coal mine, current condition and forecasts—case study

Trapped with Availability

SIL apportionment and SIL allocation

On design of stiffened 3D-multi-cell for enhancing the vehicle crashworthiness and occupant safety

Model checking as a protective method against spurious actuation of industrial control systems

Evaluating an Indicator Matrix for Early Detection of Smuggling Equipment for Dual-Use

Evaluation of the occurrence probability of a railway accident with parametric uncertainties and failure dependencies using Binary Decision Diagram
Genta Kikuchi, Makoto Sato, Kohei Maruchi, Masanori Yabuki  
Failure Classification on Residential Fuel Cells based on Multi-Sensor Data

Maren Maal, Kjersti Brattekås, Kjell Olav Nystuen, Ronny Windvik  
How to assess future security threats to critical infrastructure systems? Lessons learnt and best practices from a security risk assessment of the ERTMS in Norway

Felix Möhrle, Kai Bizik, Marc Zeller, Kai Höfig, Martin Rothfelder, Peter Liggesmeyer  
A Formal Approach for Automating Compositional Safety Analysis Using Flow Type Annotations In Component Fault Trees

Miroslav Sykora, Dimitris Diamantidis, Karel Jung, Milan Holicky  
Target reliability for railway civil engineering structures

Mónica López-Campos, Christopher Nikulin, Rosa González-Ramírez, Luis Ascencio  
Integrated methodology for decision making: study of the main routes carrying dangerous cargoes in the Valparaiso region

Sok Chul Kim, Jong Seuk Park, Byung Soon Kim, Nam Chul Cho, Dong Ju Jang, Joong Woo Bae, Yong Hun Lee  
A methodology of the threat assessment for LOLA due to malicious aircraft crash onto NPP

Vera Deeva, Stepan Slobodian  
Entropy estimation of a dynamical system via a contact interaction

Wei Zhang, Wei Wang, Weijia Feng, Wenqiang Zhou  
Research on the reliability of the spraying process based on the design of experiment

Emanuele Pascale, Laurent Bouillaut, Thierry Freneaux, Raffaele Sista, Paolo Sannino, Pietro Marmo  
Application of the Weibull distribution for the optimization of maintenance policies of an electronic railway signaling system

Zdenek Vintr, Michal Vintr  
Tools for Components Reliability Prediction

Youngkyun Seo, Kwangu Kang, Hyon-Jeong Noh, Jung-Yeul Jung, Daejun Chang, Seongjong Han, Sanghyun Park  
Availability Estimation of Utility Module in Offshore Plant Depending on System Configuration

Fabio Postiglione, Mario Di Mauro, Giovanni Galatro, Maurizio Longo, Marco Tambasco  
Availability evaluation of a Virtualized IP Multimedia Subsystem for 5G network architectures

Guang Zou, Kian Banisoleiman, Arturo González  
Reliability-based inspection planning in view of both crack initiation and propagation

Yawei Zhao, Junyou Shi, Weiwei Cui, Wenzhe Li  
Research on false alarm identification method considering BIT test threshold

Ceena Modarres, Anthony Coburger, Enrique Droguett, Mark Fuge  
Computer Vision for Damage Recognition and Location Identification: A Deep Learning Based Approach
Wenqiang Zhou, Dong Zhou, Long Xue, Wei Zhang  A Method For Parallel Relative System Maintenance Decision-making Based on Product Health

Xinlei Zhao, Xiaohong Wang, Lizhi Wang, Dawei Lu, Tongmin Jiang  A reliability evaluation method based on Gamma process with ADT

Rui Du, Min Huang  Economic Design of CUSUM Control Charts Under Preventive Maintenance and Loss Functions

Alena Oulehlová, Pavel Kincl, Hana Malachová  Training of the Members of Crisis Management: the Scenario of the Forest Fire

Yahui Li  A Novel Strategy for Fault Propagation Study of Complicated Gear System Based on Network Theory

Xinrui Ma, Zili Wang, Dongming Fan, Yi Ren  An Enhanced GO Methodology with Multiple Signal Transmission Types based on Bayesian Network

Jianxing Lu, Xiaohong Wang, Lizhi Wang, Tongmin Jiang  Imperfect preventive maintenance model study based on product degradation process considering cost and availability

Cheng Yu, Fu Guicui, Jiang Maogong, Qiu Yao  Lifetime estimation for IGBT modules in power converter under power fluctuation condition

Xiaolu Fu, Jun Yang, Songhua Hao  Optimal Design of Step Stress Accelerated Degradation Test Plan for Solid-State Lasers

Tianpei ZU, Meilin Wen, Rui Kang, Qingyuan Zhang  An Uncertainty Evaluating Model for Uncertain Metrics in Reliability

Mitja Franko, Branislav Panič, Marko Nagode  Damage based reliability prediction of dynamically loaded components

Claudia Vivalda, Maria Angela Musci, Nives Grasso, Elisa Guelpa, Vittorio Verda, Marco Piras  Forest wildfire risk mapping and the influence of the weather and geo-morphological input data

Lexiao Li  Physics-of-Failure-based method of reliability modeling for LED driver with failure correlation

Jack Reeves, Rasa Remenyte-Prescott, John Andrews  A sensor selection method for fault diagnostics

David Rehak, Simona Slivkova, Veronika Brabcova  Evaluation the resilience of critical infrastructure subsystems

Zhaojun Hao, Min Huang  The applications of DOE and computer simulation technology to the improving process reliability of turbine blades of aircraft engines

Wieger Tiddens, Olaf Brouwer, Jan Braaksma, Tiedo Tinga  The business case for condition-based maintenance: a hybrid (non-) financial approach
Critical Infrastructure and Redundancy in Slovenian Electric Power System

Optimization of maintenance policies for complex and highly reliable multi-unit systems

IFF-MECA: Combined handling of interfaces, functions and components based failure analysis

Indication of Critical Infrastructure Resilience Failure

Risk methods for the assessment of security of large structures: the case of an international airport

The Agile Hazard Log approach

Auditing operational readiness of Management of Change

Detection and Classification of NPP Accidents Scenarios based on Residual Sign Matrices (RSMs)

Method for planning optimal degradation tests in consideration of budget and statistic accuracy applied on pitting tests on gear wheels

Temporal clustering of retroreflective marking

A Benchmarking Study on Online Cross Calibration Techniques for Redundant Sensors

Evolution of fault trees – From hardware safety analysis to the integrated safety analysis of software-intensive control systems

Uncertainty quantification of microwave resonator cavity for space borne hydrogen atomic clock

Airborne miniature aircraft: Program, Design and Optimization

Reliability analysis of the space mechanism considering the performance degradation and dynamic time-variant characteristics

Research on Establishment Method of Natural Environmental Spectrum and Accelerated Test Environmental Spectrum

Securing employees against hazardous clients in challenging contexts
